EDUCATION

BS Computer Science
FAST-NUCES, Karachi
CGPA: 3.2
Expected: June 2026

Higher Secondary (HSC)
BAMM PECHS Govt College
2020 – 2022

Senior Secondary (SSC)
Karachi Public School
2018 – 2020

TECHNICAL SKILLS

Languages
C/C++, C#, Python, Java, SQL, Assembly

Web Technologies
Next.js, React

Databases
PostgreSQL, MySQL, MongoDB, SQL Server, Oracle

Blockchain
Ethereum, Solidity

Tools & OS
Git, Vercel, Windows, Linux

ACHIEVEMENTS

- National Skill Competency Test (NSCT): 73/100 marks, 98.5 percentile (Apr 2026)
- Dean's List of Honor 7th Semester, 2025
- Co-Head, Blind Code Programming Competition 2025
- Volunteer – PROCOM'23

PROFILE

Computer Science student at FAST-NUCES with hands-on experience in full-stack web development and blockchain. Proficient in building scalable web applications, RESTful APIs, and AI-integrated platforms. Passionate about solving real-world problems through clean, maintainable code.

WORK EXPERIENCE

Freelance Full-Stack Developer | LaGuardia Petroleum Pakistan *Jan 2026*

- Built a dynamic corporate website using Next.js with a custom CMS for content management.
- Implemented PostgreSQL database-driven content rendering and API integrations; deployed on Vercel.

Freelance Full-Stack Developer | Ultimate Blend Pvt. Ltd *Nov 2025*

- Developed company website with Next.js, responsive UI, and managed live deployment on Namecheap.

Software Intern | M3 Technologies Pakistan Pvt. Ltd. *Jun – Aug 2025*

- Developed RESTful APIs in .NET Core for data exchange and application functionality.
- Built a Windows Service for automated background email notifications to users and admins.

PERSONAL PROJECTS

Sehat Vault - Final Year Project
Blockchain-based healthcare platform (August 2025 – Present)

- Designing Ethereum smart contracts for asset-backed healthcare benefit generation and secure on-chain patient data management.
- Building a multi-role frontend portal (Hospital, Bank, Patient) using Next.js; backend integration planned for future phases.

Film-Find
Movies Recommendation App (April 2026)

- Built a full-stack movie recommendation app using React, FastAPI, and Supabase, with personalized feeds, user ratings, and a taste radar chart.
- Used content-based filtering to recommend movies based on saved user preferences; connected to TMDB API with 10 endpoints and deployed on Vercel.

Prism - AI Sign Language Recognition System
Real-time AI communication assistant for deaf/non-verbal users (March 2026)

- An AI-powered ASL recognition system using a custom-trained Transformer (4 encoder layers, 4 attention heads, 128 hidden dims) and LSTM built from scratch with MediaPipe hand tracking, trained on Kaggle's ASL Signs dataset.
- RAG pipeline using LangChain, ChromaDB, and Ollama (Mistral 7B) for context-aware, locally-run chatbot responses with no cloud dependency.

NovaLang Compiler & IDE
Custom C++ compiler with full IDE ()

- Built a C++ compiler with Abstract Syntax Trees (ASTs) and symbol table management for a custom language.
- Developed an IDE using Python (PyQt6) featuring syntax highlighting, code execution, and real-time error reporting.
- Implemented lexical analysis, parsing, and semantic analysis phases for end-to-end compilation pipeline.

Spam Email Classifier
Machine learning pipeline for email classification

- Built an ML classifier using Naive Bayes, SVM, Decision Tree, and Hybrid models for spam detection.
- Applied TF-IDF and NLP feature engineering to extract meaningful textual patterns from email datasets.
